(54) Title: INSTRUMENT PANEL IMAGE DISPLAY DEVICE, INSTRUMENT PANEL IMAGE CHANGING METHOD, VEHICLE, SERVER, INSTRUMENT PANEL IMAGE CHANGING SYSTEM, INSTRUMENT PANEL IMAGE DISPLAY PROGRAM, COMPUTER-READABLE STORAGE MEDIUM STORING INSTRUMENT PANEL IMAGE DISPLAY PROGRAM

(57) Abstract: An instrument panel image display device (1) is a device for displaying an instrument panel image by which various information is provided to a driver. In this device, the instrument panel image includes a plurality of gauge-like images, disposed in specific positions, each of which indicates a specific image. Further, this device includes an image data changing section (10) for changing image data, which codes each gauge-like image, into image data, which codes other gauge-like image. On this account, it is possible to display a new instrument panel image obtained by combining various gauge-like images. That is, in the instrument panel image display device (1), it is possible to more freely select the instrument panel image.
